1

This is the main Edpuzzle page. Here you will be able to access Edpuzzles main functions.

2

To begin creating content, you will need to press the Add content option at the top right corner of the screen

+ Add Content

Creative at home

When selecting the Add content option you will be able to select a few options:

- **Discover video content:** This option allows you to use videos from platforms such as youtube for your projects.
- **Upload video:** With this you will be able to upload your own videos for your projects
- **Record video:** You can record videos to use in Edpuzzle. You will need to install an extension in order to do so.
- **Student project:** This will allow you to create projects that your students will need to do.

The screenshot shows a search interface with a search bar containing 'stock footage'. Below the search bar, there are tabs for 'Community', 'My School', and 'YouTube'. Underneath, there are filter options for 'Subjects', 'Grade levels', 'Country', and 'Source'. The search results are displayed in a grid of video thumbnails. Each thumbnail includes a video player preview, a duration, a title, and the creator's name. Some results also have an 'Edpuzzle hosted' badge. The thumbnails include: '1987 Stock Market Crash (stock footage / archival footage)' by Wendy Marus; 'Stock Market - Buying Stocks' by CATALINA RAMON; 'Stocks & the Stock Market' by Jill Klusman; 'Stocks and Stock Market' by Kelley Rivera; 'Will Rogers (stock footage / archival footage)' by CHERYL SHERMAN; 'COMP A-05' by TCR; '2714B' by TCR; a 4K Ultra HD snail video; a blue smoke video; and 'Les Différents Niveaux de Stocks' by a man in a red shirt.

To create a project, we will use an already existing video online by pressing the Discover video content and selecting our desired video.

5

Once you select your desired video, you will see your preview. To edit the video press the Edit option.

The screenshot displays a video editing interface. At the top, there are three tabs: 'Cut' (which is selected and underlined), 'Voiceover', and 'Questions'. Below the tabs is a video player showing a close-up of a snail's head. A play button is centered over the video. In the bottom right corner of the video player, the YouTube logo is visible. Below the video player, there is a timeline with a blue bar representing the video's duration. Above the timeline, there are controls for play, a time display showing '00:00', and an 'Add cut' button. To the right of the timeline are 'Undo' and 'Reset' buttons. Below the timeline, there is a section titled 'Why cut a video?' with a lightbulb icon, followed by the text: 'Save time by cutting any sections from the video that aren't relevant for your students.' In the bottom right corner of the interface, it says 'Total new time 09:30'. On the left side of the interface, there is a sidebar with the text 'Video events' and a double-left arrow icon.

This is the video editing screen. Here you will be able to: cut videos, add voiceovers to videos and add questions to videos.

The cut option allows you to add cuts to the videos and change the order of the video or simply erase parts you do not wish to use in your project.

8

The voiceover option will allow you to add your own voiceovers to videos.

Bear in mind that you can't use this function if the video you are using is from Youtube.

Creative at home

9

-  Multiple-choice question
-  Open-ended question
-  Note

 Why add these?

Create questions to see which students understood the lesson, and add notes to give more information or get students' attention with a quick audio note!

**The questions tab is the main focus of Edpuzzle.
There are a few types of questions available for
your projects**

10

The types of questions you can add to a video are the following:

- **Multiple choice questions:** These are questions that will have different available answers for your students to choose from.
- **Open-ended questions:** These questions will require your students to write the answers they think are correct. Then, you will need to correct these answers manually.
- **Note:** These are simple notes that will appear at certain points you will select throughout the videos.

Multiple-choice question

Open-ended question

Note

Why add these?

Creative at home

To add questions to your video, you will first need to select the point in the video you wish to add the question to. We will use Multiple-choice questions as an example but the steps to follow are the same for all types of questions.

11

Multiple-choice question

B I U x^2 x_2 fx

Type your multiple choice question here

✓
✗ **B I U** x^2 x_2 fx

Type your choice here

12

☰ Multiple-choice question ▾

B I U x^2 x_2 f_x

Is that a snail?

✓ **B I U** x^2 x_2 f_x

Yes, of course It Is. Feedback

✗ **B I U** x^2 x_2 f_x

No, that is a Jiraffe. Feedback

+ Add another answer choice

Cancel Save

Now, you will need to add the question itself. Then type the psibble answers. After the answers have been written, you must select which one is correct and which one is incorrect. Then press the Save button.

Saved automatically

Finish

After you are done with your project, you can press the Finish button at the top right corner of the screen and then share it with your class.
